Subject: Diamond Alkali - Dioxin Investigation

Bill and Adam – Just letting you know that Region 2 set up a folder on the Passaic River Digital Library Sharepoint site to share data and other information relating to the dioxin investigation. Thus far, we have added the QAPP, and the data reports for the sampling in the river at RM 10.9 and in the Phase II area of the “Tierra Removal” near the former Diamond Alkali facility.

We are expecting data reports for the samples from the two containment cells in the beginning of January 2016. As previously noted, we are holding time at 11 am on February 2 (one of the two days you had suggested some time back). I suggest we not try to reschedule until we actually have the data reports in hand.

-Sarah
